Sub:-- Urgency to look into for extending help to Sri Amiya Kumar Bose who tested covid-19 positive and is to be admitted in any CIL- Empanelled Hospital in Nagpur due to worsening condition

Dear Sir,

Our BONAFIDE MEMBER Sri Amiya Kumar Bose, (AIACE Membership ID: M-1685, Mobile: 9021094718), EIS No. 90115031, Retd Chief Manager (CIVIL), WCL, has been tested Corona positive since last 12 days and availing treatment at home.

His condition is worsening daily, and now for further better treatment, he intends to be admitted in any one the CIL-empanelled hospitals like Wokhardt or Meditrina hospital today. His Medical Card, issued by WCL under CPRMSE is WCL/1516 and contact email id is amiyabose1960@gmail.com.

He has informed your office for needful approval and endorsed a copy to us.

I am posting his representation in Annexure-I.

AIACE requests your kind consent so that needful approval for his cashless treatment is obtained in advance at the earliest. This will be a boon to Sri Bose and his family. Scanned photocopies of Medical Card and other reports are attached in Annexure-II & III respectively.

Thanking You,

(P.K.SINGH RATHOR)
Principal General Secretary

Encl:Annexures-I to III As above

Lab ID No.	DP20-13548-09	Sample ID	4786

Molecular Biology
***Test for COVID-19 RT PCR**

Investigation	Finding	Biological Ref. Range	Method
Specimen:	NPOP Swabs		Real Time PCR
SARS-CoV-2 PCR:	POSITIVE	Negative	by Quantstudio5
Ct Value (E Target):	21		
Ct Value (RdRp Target):	19		
Ct Value (RP Target):	27		

Interpretation: Negative Results indicate: SARS-CoV-2 is not detected in the given sample.
Positive Results indicate: SARS-CoV-2 is detected in the given sample.
Inconclusive Results indicate: Inconclusive. This could be due to low viral load in a sample. A repeat sample is recommended in such cases.

Remarks:
The test is approved by ICMR, India (Registration No: DPMDLN).
The PCR run is validated by RnaseP, Positive and Negative controls.
Negative results do not exclude COVID-19 & should not used as the sole basis for treatment or other patient management decisions.
Optimum specimen type and timings of peak viral levels during infections caused by SARS-CoV-2 have not been determined. Collection of multiple specimen (Types & time points) from the same patient may be necessary to detect the virus.
A negative result in a single upper respiratory tract sample does not rule out SARS-CoV-2 infection. Hence in such cases a repeat sample should be sent.
Lower respiratory tract samples like Sputum, BAL, ET aspirate are appropriate samples especially in severe and progressive lung disease.
Kindly consult referring Physician / Authorized hospitals for appropriate follow up.

End of Report
